48 HOURS

Up to 48 quality hours for English speaking, writing, listening, reading and singing.

FUN ACTIVITIES

Learning through a series of carefully designed fun activities! The key idea is for you to enjoy your learning experience in the camp.

TOPIC

Enhancement topics in subjects like sciences, art, music, history and more.

CULTURE

Excursion to Putrajaya, Kuala Lumpur, Kuala Selangor Eco Park for firefly and eagle viewing.

OUR APPROACH

Say goodbye to boring English classes - we've gotten a better way! Our hands-on approach not only boosts your language skills, but also expands your global perspective and ignites your curiosity. Get ready to learn and have fun like never before!

HAPPY LEARNER, CONFIDENT SPEAKER

OUR TEACHERS

Immerse yourself in the world of English with our team of experienced expat teachers who are native English speakers and our qualified teaching assistants. You're in good hands!

OUR LESSONS

Speak like a pro! Our tailor-made lessons and outdoor activities hone your speaking, listening, and pronunciation skills, boosting your confidence to communicate fluently and fearlessly in English.

This isn't your typical language camp - we're all about shaping students' futures with the values of King Henry VIII College. We're here to empower you to be a responsible, resilient global citizen who makes a positive impact on the world and lives your best life!

Spark The Imagination!

Key Stage 2:
8 – 11 Years Old

Week 1

Come explore with us! The outdoor adventures will unleash creativity, nurture curiosity, and enrich cognitive and social-emotional growth. Let's wander like Wordsworth and discover the magic of the world together!

Imagine lying on your back, watching fluffy clouds float through the vast blue sky, and spotting all the shapes and figures they form. Or gazing into the starry night sky, spotting constellations and marveling at the beauty of the glowing moon. Or running free in an open field, feeling the breeze on your face and the grass under your feet. Or observing a little bug climbing up a single stalk, down on your knees and seeing the world from its perspective.

Week 2

When imagination meets adventure in role play. Become whoever you want! Role-play imagination lets you embody different characters and explore exciting situations from a new perspective, while enhancing communication, problem-solving, and empathy skills.

Unleash your inner storyteller with role-play! Use your imagination to create a character with a unique personality, backstory, motivations, and goals. Then, form relationships with other characters to create an engaging and complex scenario full of surprises and adventure. With role-play, the possibilities are endless and the fun is guaranteed!

SHAPE THE FUTURE

Key Stage 3:
11 -14 Years Old

Week 1

The Global Citizen

During the first week of the program, we're all about breaking down barriers and bringing people together. It's the culture awareness week, where you will explore geography, history, cultural differences, and how to respect and accept them. All while grooving to some funky beats, it's like a world tour without leaving the classroom!

As part of the program, we'll take you on a quick jaunt to the famous Pink Mosque in Putrajaya, where you'll get a crash course in Muslim culture. It will be an awesome way to expand your horizons and become a true citizen of the world.

Week 2

The Science Explorer

Get ready to enter the wacky world of science, where everything - from the tip of your nose to the furthest star - is made up of tiny molecules and atoms. Join us for your second week as a Science Explorer and learn the universal language of science. With this knowledge, you'll be able to unlock the mysteries of life and the universe! So, strap on your goggles and lab coat, and let's dive into a wild and crazy journey into the recipe of life!

Our teachers use hands-on experiments to teach Biology, Physics, and Chemistry, making learning enjoyable and memorable for fellow Science Explorers. Plus, this interactive and task-based approach is a game-changer for students preparing for IGCSE compulsory science subjects. Science just got a whole lot cooler!

Hopes for the Future

Key Stage 4:
14 - 16 Years Old

Hey there dreamer, we're thrilled to hear you've got your own ideas, and we're here to help you take them to the next level! Our summer program at King Henry VIII College is designed to turn your dreams into a reality by refining your ideas and giving them direction.

Over the course of this intensive two-week program, team Dreamer will immerse themselves in developing specialized business knowledge, language, and vocabulary, while simultaneously honing their grammar and pronunciation skills. This comprehensive learning experience will incorporate a range of dynamic and interactive methods, including multimedia presentations, collaborative group work, stimulating games, real-world problem-solving scenarios, and targeted project work that emphasizes the practical application of new skills.
